

Position: Industrial Electronics /PdM Technician

Company Description:

Kurz Industrial Solutions is a leading industrial products and service distributor of electrical motors and drives and mechanical power transmission equipment as well as repair and rebuilding of electric motors and gear reducers to 10,000 Hp. Based out of Neenah, Wisconsin, and serving the Midwest, Kurz Industrial Solutions has been providing continuous improvement and customer satisfaction since 1918. Kurz has other locations in New Berlin, Wisconsin and a new facility opening in Eau Claire, Wisconsin fall of 2015. Repair capabilities include 20 Ton overhead cranes, up to 10,000 Hp repair and repair/rewind of any motor including AC/DC, wound rotor, slip ring, shaker, traction and servo motors. We also offer electronic board and servo repair, as well as on-site and preventative maintenance services. Kurz Industrial Solutions services all industries and operates 24/7/365.

Job Description:

Kurz is seeking an Industrial Electronics Technician with an emphasis in Predictive Maintenance, to support our maintenance services business. This position will perform accurate on-site analysis of electrical and mechanical equipment using various technologies. The successful candidate will use route based services as well as on-line monitoring systems to recognize opportunities for our clients that will benefit equipment reliability. This position will work cooperatively with outside sales to grow Kurz's preventative maintenance services.

Primary Job Responsibilities:

- Very good mechanical knowledge of typical plant equipment such as compressors, fans, motors, and gear reducers.
- Experience with PdM technologies such as laser alignment, vibration analysis, ultrasonic testing, and infrared thermography.
- Capable of performing on-site services using these technologies and skilled in field data collection, analysis, reporting, troubleshooting, estimating and installations.
- Capable of performing on site motor testing including surge testing, IR testing and motor circuit analysis using PDMA tool.
- Possess excellent writing and verbal skills in relation to the technical aspects of this work
- Possess a 24/7 mindset, take pride in our work and an attitude of taking care of customers, even after hours.
- Position requires 30-50% travel, overnights and overtime work on occasion.
- Communicate and interact professionally with customers and other team members to meet the customer's needs.
- Perform other duties as assigned.

Key Attributes:

- Technical Capacity
- Ethical Conduct
- Possess a positive and competitive work attitude
- Take pride in your work
- Communication proficiency
- Customer focused – willing to do whatever it takes
- Detail oriented – good at documentation and organization
- Self-starter that can take the lead with minimal direction

Benefits:

Kurz Industrial Solutions offers a competitive compensation package, a comprehensive benefits package and 401K with company match. Visit us at www.Kurz.com or contact sroth@kurz.com
